Read the text and answer:

The construction industry has different trades or 'crafts'. A tradesperson is a specialist and normally has a qualification from a vocational school or other training institute. Plumbers, electricians and roofers are all tradespeople. Other tradespeople on residential housing projects include carpenters, painters and concrete finishers. Tradespeople are often subcontractors and work for a general contractor or a client.

Are these sentences (True – False)? :

- 1- Tradespeople are general contractors.(False)
- 2 – A tradesperson like a roofer is a specialist.(True)

Choose the correct answer, a, b or c.
